Other: _____

The following is a list of the only water parameters that Best Plumbing Supply Inc. tests for:

PH of the water;

Dissolved Iron;

Manganese;

Hardness of the water; and

TDS (total dissolved solids)

Please remember that we do our best to come up with a good solution to make the water better; however, there may be organic minerals in the water that complicate water systems and prohibits us from resolving the issue. Best Plumbing Supply Inc. is not responsible for any other water issues other than what is specifically being tested for as mentioned above.
